## WELCOME NEWS.

The official announcement on the part of Charles H. Schlacks, vice president of the Denver & Rio Grande Railway company, that Salt Lake is to have a larger and better depot than was at first planned is welcome news.

Today men are clearing the ground and getting ready for the preliminaries so that by the time the last spike is driven in the ties of the Western Pacific now building east and west between San Francisco and Salt Lake this City will have another railroad station commensurate with her importance as the hub of this inter-mountain re-

Nothing is so lasting as first impressions. The tourist, investor or man of leisure who alights from a train in a strange city sums up the progressiveness of the City by the appearance of his immediate surroundings. A stately and imposing railroad station ushers him into the town and he immediately comes to the conclusion that here is a modern, up-to-date community.

Salt Lake has long been handicapped in this respect and years ago the City outgrew its depots. The Harriman interests long since realized this but the "wizard of Wall street" had bigger plans in view that needed immediate attention then. Today a stately edifice is rearing its walls at the foot of South Temple street as the Oregon Short Line's quota to Sait Lake's growing greatness. By the time the Western Pacific is completed this structure will be duplicated, if not im-

proved upon, on Third South street. To some it is regretted that the Gould and Harriman interests could not get together upon common ground and erect a union depot where all railroad lines running into Salt Lake could find terminals. This would be a great accommodation to the tourist, but there are interests in this City whose representatives affirm that two depots are better than one big one for any city. Men whose occupations run from realty to driving an express wagon affirm that two depots mean more money for any city. Travelers who under ordinary circumstances would not leave the confines of a union station while transferring from trains, under other conditions drive across the city and thereby receive impressions that are lasting, " we cannot have a union denot we

are now assured off two stations and the glad tidings that the Gould interests are now starting operations in earnest will be warmly welcomed by every well wisher of Salt Lake.

#### DUBOIS DEFEATED.

The supreme court of Idaho has decided the case against the Dubols following in the only way possible consistent with the facts. It has decided that the Democrats at the Wallace convention had 155 legally elected delegates to 128 Dubois men. The effect of this will be to place on the ballot the ticket named by the regular Democrats, and to eliminate anti-"Mormonism" from the campaign in Idaho. The friends of Dubois proposed the complete disfranchisement of Latter-day Saints They sought to accomplish this under the acgis of one of the great National parties. But the methods by which they hoped to capture the convention have now been declared irregular. They feared an investigation and endeavored to prevent it. No wonder! They knew

they were wrong. We have made the remark before that anti-"Mormonism" cannot stand the test of importial investigation. Whenever its claims and allegations are brought to the light they fado away. As long as its advocates deal in generalities and play upon the prejudices of ignorant multitudes, they can always obtain a hearing, just as the stories of anti-Semites in Russia are listened to by the Ignorant rabble until they are stirred to acts of frenzy; but when their tales come before the courts, or before a body like the Senate, or even before enlightened public opinion, they are shown to be false hoods, or the creations of a diseased imagination-sensations created for the purpose of influencing public opinion.

#### THE STATE FAIR.

Next week promises to be a gala one in the history of the Utah State Fair A sociation. Reports received from the supervisors of every department indicate that this year's exposition is due to exceed previous efforts in both the quality and quantity of the displays. This will make the thirtieth exhibition of the resources of Utah. To the student it will demonstrate how the Beehive state has grown. It will indicate how it might have grown but for the strife injected into our public life by anti-Mormons to whom the welfare of the State is only a secondary consideration, and to those who have the welfare of the community at large the need for additional quarters wherein to properly set forth our resources in stockraising, horticulture, agriculture, the manufactures, crafts and arts will be

apparent. It is a source of satisfaction that the management of the big undertaking has this year provided a suitable building wherein the artists of Utah can exhibit their handiwork and the product of their brain. The good work should not stop there. Last year crowded conditions prevailed and this year, even with the removal of the arts to their new home, the space is inadequate.

An educational building is sorely needed where the schools and colleges can have plenty of elbow room and attractively display the year's work to advantage. A structure devoted to floriculture also would prove a popular rendezvous and still furtherdemonstrate that the desert is surely blossoming like a rose.

These will all come in time as in the past through legislative appropriations. In the meantime the thirtieth exhibition promises to be the occasion of adlectives and congratulation

## "AMERICAN" PLATFORM.

The so-called American platforms of course, start with declarations of the freedom of voters from ecclesiastical control. These declarations are aimed at the Church of Jesus Christ of Latter-day Saints, but they are only so much gibberish, for the reason that the Latter-day Saints Church does not exercise the control denounced. They are hypocritical, too, since the party leaders know that they are using a falsehood for the purpose of playing upon the prejudices of their followers. They might as well frame pronunciamentos against cannibalism and appeal to the voters for support on the ground that it is necessary to end that form of barbarity in America. They might just as well denounce cannibalism, or slavery, or sacrifices to Juggernaut, as that coclesiastical control which does

not exist. It should be of considerable interest to the people of this City, who have been made to support the cause of the party that ought to be branded as anti-American, on the pretext that the Church dominates the politics of the State, to know that a similar charge is now being made against the Catholic church as regards national politics. Anti-Catholics are openly asserting, and with considerable force, that the Catholic hierarchy has designs on the National government, for purposes of its

It is claimed, for instance, that the Catholic hierarchy is at the head of the war department and has more chaplains in the army and navy than any other denomination; also that there are entire "regiments of Catholies," indicating that the ultimate aim is to have a Catholic military machinery.

It is claimed by these anti-Catholics that the Roman hierarchy is after the control of the postal department. for the purpose of establishing censorship of the American press. s claimed that a number of rulings have been secured whereby hundreds of American newspapers have been put out of business in the past few Scores of American papers, years. it is charged, have been forced to suspend since the 1st of January, this year, because they have been unable to comply with rules originated in Rome, but that no Catholic paper has been crowded to the wall or its rights to the mails questioned. instance of censorship is given in the case of a paper called "L'Asino." That paper, it is said, the clergy has tried to suppress in Italy, without success, but it was prevented from difference to those who lie on beds of entering the United States, by order

of the postal authorities.

claimed, is a Catholic order which exists for the purpose of making the United States Catholic. And when Rome succeeds, the anti-Catholics say, in making this country a Catholic power; when the army and navy are under church control, and the entire government machinery can be depended on, then the Pope backed by the United States, a world power will again be a factor in world poll-

This, we say, is the claim of anti-Catholics. In a recent issue of Appeal to Reason we find a number of quotations in support of the contention that Catholics are in politics in the intorest of the church. Here is one credited to Leo XIII:

"To the voters: Catholics must not vote for men to fill responsible positions except those who are true and loyal Catholics. It is not possible and reasonable to expect that irreligious (non-Catholic) men will put down existing agis." isting evils."

The following is credited to the Archbishop of Colon:

"The voter will sin if he does not fulfill his duty at election time. He must choose Christian men who are faithful to the church and who fear God, men who will not bring discredit upon it and not cause it to take a backward step by working against truth and righteousness, but who will rather advance the interests of the

The following paragraphs are said o contain ,the instructions of the Archbishop of Manila:

"The ones who have in keping your body and soul ask that you do not only vote for men who are wise, but for men who are good Catholics, who will promote the welfare of the people according to the companying to the service of the people according to the companying the Coll street. mote the welfare of the people according to the commandment of God given to Moses when he said 'Choose you from the multitude men who fear God and hate iniquity and make them ruleis over you.' (Exod. 18.) And because many of you do not know for whom you should vote, you must confer with your Father Confessor, and attenues of you of the holy church. other good men of the holy church, who have clean consciences toward God. If you vote for a man who will not advance the interests of the people,

you will commit a mortal sin.
"Never vote for any other man than
a true Catholic. If you vote for a true Catholic. If you vote for any other than a true and loyal Catholic you will be overwhelmed by the many sins that will be thrust upon your besides you will be thrust upon you; besides you will be respon-

upon you; besides you will be responsible for all he does.
"Therefore we desire that you take these two words of instruction: First, it is the duty of all Catholics to vote when they get a chance; second, the voter has a binding and heavy duty to induce only Catholics to vote and to vote only for Catholics."

We offer no comment and express no opinion, at this time, on the charges We merely state the fact that made. the Latter-day Saints Church is not the only one that is being assailed on the ground of interference in politics. We claim that neither churchism nor anti-churchism of any kind should exist in American politics. True American citizens of all creeds will sooner or later have to combine and fight the endency of putting up religious fences on the political field. They will have to do that, to save the Constitution and the government. Better unite before it

### CHOLERA AND EUROPE.

The appearance in St. Petersburg of the Asiatic cholera, all types of that dread disease having now developed there, brings to the consciousness of all Europe that this epidemic may get beyond control and ravage the centers of civilization in a way unknown in modern times.

According to Monday's dispatches from St. Petersburg there have been, since the recent outbreak of Asiatic cholera in that city 15,683 cases reported in Russia, and 7,102 deaths. In St. Petersburg alone, since the presence of the disease was officially admitted, Sept. 8, there have been 4,931 cases and 1,875 deaths reported.

On Saturday the number of new cases in the city was 268, and the number of deaths 143, as compared with 312 new cases and 153 deaths for he previous twenty-four hours.

The morgues in the Russian capital are crowded, the public schools are turned into hospital wards, and the war department has opened stores to supply the immediated needs of the people afflicted. In the poorer districts, army field kitchens have been set up to dispense free food.

In 24 hours there were reported 398 new cases and 141 deaths. The record of former epidemics of this disease in Russia indicate that the contagion is likely to spread still further.

The fact is that the city is very unanitary, and the waters of the Neva river are believed to be contaminated. At all events the disease finds in the prevailing condition of uncleanliness most suitable field for propagation. From among the poorer classes, however, it soon spreads to the soldiers, and then invades the ranks of the

#### POLITICS LIVENING UP.

San Francisco Chronicle. As it is turning out nobody cares to talk about the tariff. Voters go to sleep over a discussion about trusts. Nobody is interested in getting male-factors of great wealth into jail. There is a screne confidence that our Federal judiciary will retain the power that it has always had. not enthusiastic about insuring other not enthusiastic about insuring other people's deposits. Nobody cares a rap about any of the political platforms. The canvass has settled down to the question whether Bryan or Taft would make the best president. And with the clear defining of the personal issure that the time begin to rattle and the crockery to smash in the political kitchens. This is not a fight over principles. It is a fight over candidates. s a fight over candidates.

## WHAT NOT TO EAT.

Homeopathic Envoy. A little joke floating around in the clumns of the press is that of a man who had consulted a doctor and was doubtful of his skill because he did not forbid him eating everything he liked. Its opposite, said to be true, is of a doctor who writes much for the public on the subject of what to eat, public on the subject of what to eat, or, perhaps, more accurately, on what not to eat. He had written the usual patter about hot weather diet, sticking to fruit, "a little cereal," vegetables and water, and the like, and then was observed one hot day with a big dish of ham and cabbage, sausages, lobster, and ale, which he was stowing away. of nam and cabbage, sausages, lobster, and ale, which he was stowing away as if he thought it good for him. The average adult is the best judge of his own dlet; he very soon learns what does not "agree" with him, and, knowing this, the consequences of eating it serve him right. If anything does 'agree," eat it if you like.
